Module 3 :

ASSESSMENT 3 PRESENTATION

web site for business applications

INTRODUCTION

▶ Learning how to begin coding a website can be a tough task. If you're not familiar with coding languages, it's even harder. But learning how to code a website is easy with the right guide.

▶ If you want a website to look and function as you wish them to, you need to get familiar with web technologies that will help you achieve the goal that has been set.

▶ Developing an app or a website typically comes down to knowing 3 main languages: JavaScript, CSS, and HTML. And while it sounds quite complicated, once you know what you are doing, understanding web technology and the way it works becomes significantly easier.

Font Based Icons in Responsive Design Using FontAwesome (Body)

▶ fonts are essentially scalable vector graphics. There is no better way to make beautiful navigation and control icons in responsive design projects.

 key elements that
are essential for designing an
effective responsive Web site,

Consistency
Compatibility
Optimized images.

CONCLUSION

▶ Learning HTML and CSS is a lot more challenging than it used to be.

▶ Responsive web design adds more layers of complexity to design and develop websites. And I spent my lot of time learning in this module just to cry to get my work to look good.
